

LW: [00:38] Okay! We're back, this is part two, this is Lance White with Andrew Bartzis, and we just left off talking about the Lemurian air cities leapfrogging into the future to make corrections. So maybe we can pick up where we left off...

AB: [00:57] Okay. Lemurian air cities are a local reality that literally is in the air. But, in between the cells of every atom is an infinite amount of space. So an air city can be out-of-reality in between the cells of the Earth... and still be an air city out of phase of reality. So when they began to create dimensional drives that created time travel effects, the air city would go into earth, and the time travel that piece of rock, and then come back into the air, so that they can influence the timeline on a soul family level, and on a DNA level. The people in the air city were looking for versions of themselves to correct. Some of them may have gotten darkness instilled into them. They would do healings on different people... They would at times, literally create an invasion force, because at the time, the dark would have the planet. Leapfrogging through time, making corrections, in a system where you have 5,000 other species, creating time travel effects ... it isn't easy, because you need a lot of cities to continually counter this.

[02:12] Where we are right now, 2011-2014, every single bit of the time war is about right now. It's about propaganda coming out, propaganda that's thousands of years old, hundreds of years old, millions of years old. This propaganda influences "the awakening", which is the end of the process where we must have graduation timeline, absolutely, it's the prime creator's will.

[02:40] So, what is a Lemurian air city? A group of people come together, un-manifest physical bodies, and with the energy create a very dreamlike reality, and that dreamlike reality takes form in the upper atmosphere, where the Aurora Borealis is. The Aurora Borealis is the Earth's dreamtime sentience, and it's where the Sun brings energy to it, to that that system of energy has reality behind it. The city itself has its own version of a unity consciousness drive, where it can go to any part of the galaxy, or any part of the universe, as long as they can remote view or remote experience those other places.

[03:28] After Lemuria went through its first fall, and went to its raise again... we go from, we'll call it 30 million years? simply because, they had to leapfrog backwards, and they had to leapfrog forward, then they had to figure out each time Earth was teleported, the old timeline wars ended, because the x-y axis where the planet was, could no longer be used as a function for creating a timeline, but the sentience that was part of the old timeline was still on the Earth, and Earth adopted those as new "first species". Those new first species became part of the Lemurian society, and left. When they left, they migrated away and became part of the polluted reality that was out there with drama and got forced back here. This is this endless come-and-go from

Earth.

[04:21] Lemuria's second raise, where it fell and it raised, as the air cities figured out this timeline between here, this timestream between here and here, and this light part of vibratory space, they could try to push out as many of the negative incarnating souls that were being forced at us from as many as 6,000 or 7,000 other planets that were under domination and control.

LW: [04:48] Wow... that's a big job! And how successful have they been at it?

AB: [04:55] Well we're here now. (both laugh)

LW: [04:59] Well yes, so the really exciting part to me is all of this has to be wrapped up between 2011 and 2014. (Correct) So we are in the final-

AB: [05:11] You have to have graduating students. You have to have gradulators.

LW: [05:15] What happens to the people who are not "ready"? Is that even an option?

AB: [05:20] Earth can bilocate and create multiple versions of itself, and allow the separation of densities of people that are ready or not.

LW: [05:28] So that's where you have this concept of different timelines, for people who are totally asleep, people who do not want to awaken, who would rather just continue on like this and have an experience of light and dark. So that is a possibility?

AB: [05:41] Its in dreamtime though. See, we are a unity dreamtime society...that, our world is set up, we have a "global dreamtime". All of our people have a global dream center. We live in sacred geometry cities that prevent us going into the global dreamtime. "The event" is all about us, for a brief second, experiencing unified global dreamtime, and the more and more we get exposed to it, the more and more the awake people begin to experience synchronicity, déjà vu, shared dreams, and then the next layer up of awake people begin to interact with the two and teach like, you know, you have a kid that has a shared dream with a mother or a father, or something to that effect, you know, it spreads. And there's no way the system can stop people sharing that way.

LW: [06:32] Ahh! ...One-on-one. Right ...even though there is highly-developed technology to observe, monitor, there's mind-control, and so on and so forth. Now you mentioned "the event", um, there was a television show that came on and was aired briefly, called "The Event", about

everybody collapsing, unconscious, but they somehow accessed their future lives, and I don't remember the whole story, but it seems like it was a foreshadowing, and doesn't the dark use the hollywood film industry to-

AB: [07:05] Soft disclosure.

LW: [07:07] Soft disclosure, yeah, so they can say, "well we told them it was coming"

AB: [07:12] Well soft disclosure exists for many reasons. At times, its just a really creative person coming up with an incredible storyline, and at other times they're influenced by energy beings that say "do this" because it needs it, or you have other people creating things to create DIS-unity and propaganda... you know, we've talked about Nibiru and Planet X... It was a real situation with a real planet. It's been moved, dozens and dozens of times... We, as a species, every time they re-air the series, bring it back. They had had to install technology on it that literally keeps it out-of-phase, so our fear consciousness doesn't re-manifest it. Okay?

[07:56] Why Nibiru? Because in the past, the main domination-and-control beings had pieces-parts of themselves all throughout the timeline, that could communicate to the central hive location, because it's all the same being. So, 2011 to 2014 there's over 17 million different things that are of these 15 beings... There's 17 million of them now.

LW: [08:25] Wow...now how does that all get resolved? and what is... let's hear more about the event, and how that... how you've seen that.

AB: [08:34] Okay. Umm... I just described, well I'll use this one I used before, you have children sitting at a breakfast table before they have their first period class. Every school's got that. Now I had a dream that said "this, this, this" and the kid next "Oh my God I had the same dream", and the same kid and the kid over there. That begins the spread worldwide, where kids have technology to share. The adults will experience it differently. The asleep adults will experience déjà vu. Let's say you have two people walking in the street, and one goes, "Oh my God, déjà vu!" and at the exact same time, the other guy goes, "Oh my God, déjà vu!"... you have two people going déjà vu at the same time, pointing at each other- something you simply cannot deny. Period. Just, your reality is challenged at that moment. And that's the first part of the event. That gives us the "warning" that more dreamtime is coming.

LW: [09:27] Okay, so that is all of...for those who are more awake, we will be-

AB: [09:33] Seeing that! Seeing that among our people that are asleep.

LW: [09:37] Right...and then we will be able to interpret that correctly as part of the event that's occurring, because we're clued in on what we're talking about here.

AB: [09:46] Exactly. We're all multi-dimensional beings, experiencing multiple realities. We may not know all about it, but we know enough to go, "this is disunity reality, not unity reality."

LW: [09:57] Exactly! and it's been disunity reality, for thousands, hundreds of thousands, millions of years, due to the dark and the time wars and the rest of it. Uh, and the archons, which we talked about a little bit. We... also I wanted to get the mythology of the Annunaki straightened out. Because according to Sitchin in his work, the Annunaki came here some several hundred thousand to 400,000 years ago. And that was when we were altered genetically, and used as a slave race. Now, how much of that is accurate?

AB: [10:35] Sitchin's first three books are very accurate, though his timelines are off. Sitchin's work were coopted, and the reason why, when Sitchin wrote his books, he had a multidimensional being helping him translate the texts. He was a highly spiritual person that had a purpose to come in here. His first 3 books, up to "The Wars of Gods and Men" are extremely accurate. Time's a little off because Earth has changed timestreams so many times, you can't be accurate any more in those times.

[11:05] The Annunaki were lured here. Their planet, Nibiru, whatever you wanna call it, is what's called a free-roaming, galactic entity planet. They have a drive inside them that doesn't need a solar system to support it. So they have a different version of a planetary drive. We have a unity consciousness drive. They have a dimensional drive. So, the consciousness just needs a leadership society to function psychically with the crystalline technology of the dimensional drive, so they can go anywhere they want. And when they go anywhere they want, they can do whatever it is that's within their free will to do.

[11:44] There was a multi-dimensional being, but currently the one that's in charge of all of the Arab countries, its pieces-parts are all the heads of the Arab families, the... so on and so forth... the decision-making people, and the one layer below the decision-making people, and then their banking families. So that's one being. He's the one that lured them from where they were, by creating carrot-and-sticks, so they came to a world and saw leftover technology and a destroyed world, they followed to the next world, to the next world, to the next world, 'til finally they came to our solar system, where there was nobody defending it. Completely empty. All of the light and dark forces had petered themselves out and literally couldn't fight anymore. They were done. Earth was abandoned. Literally abandoned, except for what was left of us, before the rise of Atlantis. Lemuria had fallen, multiple timeline wars, species die out, species leave/come back, and all of a sudden it's barren. The Annunaki come in and go, What's... all this this technology

and a bunch of primitive-looking people with high spiritual technology? And they go, scratch their head...

[12:56] And that's when they realized, "That's us. They're DNA-related to us." The being that lured them here, lured them to trap them into the society. To get into Earth's solar system, you need to use the stargates of the Sun, to get in here. You have to have spiritual relations or DNA relations to get into a solar system. That's essentially how all of them work. The Annunaki, as a free-roaming galactic planet, came into our solar system, and they never knew they had DNA relations to us. But the being that was luring them, did. (It) trapped them in the incarnation cycle, and stripped them of their most powerful psychics, and forced them into a reincarnation cycle. And then the second most powerful layer became the new DNA inputs for the skinsuit technology that we have here. Because they needed the Annunaki technology, the Annunaki DNA, and the soul codes, because the Annunaki had traveled all over the universe, with their planet that can go anywhere.

[13:58] Well, the main control beings have been trying to collect soul codes. Soul codes determine your DNA and soul relations to a solar system. It determines where you can go. If you're a person that has only lived on ten planets, you can only go to those ten planets on a soul level. If you want to go to more, you have to incarnate into all of them. So what these beings were doing were drawing people here that had soul codes from all over. So they needed the Annunaki because they had a piece of the puzzle that would open up this section of the universe, this section of the universe, this section of the universe, so on and so forth. They got pulled in here.

[14:38] Now Sitchin was pretty much right about mining earth, but it wasn't about the materials. It was literally that the energy that was in the materials needed to go somewhere else, so that the souls, that were earth-based souls who had migrated away, would sense the energy of the gold somewhere else, and then be lured back into the machine.

[15:00] That's the control, that's how they're playing the system here. The Annunaki still have free will, but truly didn't understand the scale of the game they got brought into.

LW: [15:14] So in a sense, even though there are no victims, they were in a sense (victims), just like the rest of us. Um, so now the Annunaki would they be reptilian in nature? Draconian? or...

AB: [15:33] Um, that's the thing, they already had enough skinsuit technology, that they're a little bit of everything. Not Every everything... but they had enough. I mean they looked similar to humans, but there were several breeds of them that chose different DNA patterns even though they were the same species. They could do anything they wanted to their DNA.

LW: [15:54] And uh, was it the Annunaki or these original 15 beings that developed the genetics that could present as a light being? In other words, they'd taken the best of the genetics of all the races, and created a false light matrix.

AB: [16:07] Correct. False light matrix essentially began by bringing the Annunaki here. False light beings, false light technology was literally created by the Annunaki and then spread to the rest of the planets of domination and control. Remember I said there was womb chakras? That if you live on that surface, the planet interacts with you? Well, you bring an Annunaki DNA master and an Annunaki weapons master, and you put them there, next to a pyramid that raises their consciousness, what are they gonna create? Mass weapons of war, mass consciousness technological DNA devices, that can be spread to an industrial system of domination and control planets.

LW: [16:46] Wow. So, in a sense, earth has become like a breeding ground for domination and control of the rest of the galaxy.

AB: [16:52] Absolutely, because of the womb chakras here. We have 200. And that is Unique. And beyond... there are other planets that have womb chakras, but they all have three or four. Okay? We have 200.

LW: [17:07] Wow! And now what about our own chakras? There's a whole controversy about us having seven chakras, twelve chakras, and then George Kavassilas brought up the idea that the chakras were installed as ways of gaining access to us from the dark side.

AB: [17:24] It is... right... and it is also wrong. We have so many first species of Earth... where do you start? It is right for one, two, three, but 17 to 34 have 185 chakras, nineteen- no, so on and so forth...there's so many first species, the story is that big. So give all the credit to George for pointing it out. Now, the next phase, all right, you, you, you, you... okay? If there's one first species they wanted to dominate the most, it's because they wanted to breed that species to mass population. And if they did, they needed to control those chakra systems, and installed domination and control at the chakra level.

LW: [18:12] Mm, right, and that's done through the incarnation process. So what else has been distorted about the incarnation process and, (both laugh) a lot... I mean basically, nobody's graduated for 400-some thousand years? Okay, so um are there individuals, because it seems to me that there are individuals, or beings that look like humans, that are not even close to being human, may not even have a soul. Is it possible-

AB: [18:48] Biomechanical suits is what you're talking about?

LW: [18:51] I suppose... clones...

AB: [18:53] Clones... That's the thing. When you create a clone of a person, you actually have a spark of that person in them. We're multi-dimensional beings. When you create a clone, there's a spark of them in there. When I function I have parts in all different parts of dimensions, inter-functioning, so that I can be in this zone and doing this. When you create a clone of a person, you have essentially created a spark that has a very similar spiritual contractual pattern to it. But it's against the entity's sovereign free will when you just collect its DNA and make a clone of it. So, as soon as you create a clone against something's sovereign free will, that entity is in domination and control, and has very little of its own sovereignty. So, a sentience can come in and out of it at any point. The vast majority of worlds out there, they have commerce that, where beings genetically build a suit for a consciousness to broadcast from one planet to another, and then they go into that suit, live there for awhile, and then leave that suit, and that suit goes into cold storage for them. Or, they un-manifest a body, travel energetically to the planet, and manifest a body somewhere else.

LW: [20:09] Huh. Well now we were, originally as we were, designed (to do exactly that) to do that, and to time travel and bilocate and move in between dimensions and so on and so forth. So, those skills have probably not existed for hundreds of thousands of years, due to the fragmentation and the control that's set up. So now how is this all gonna get resolved? How are some of the ways that this can be resolved, with all these different versions, at some point doesn't all that have to be reunified?

AB: [20:51] Through dreamtime. Always comes back to dreamtime. The technology of the skinsuit was created in dreamtime, by unity consciousness. And then you have beings that are hijacking the astral world, and creating fake dreamtimes in sacred geometry cities.

LW: [21:12] Right! And most major cities are sacred geometry cities.

AB: [21:16] Absolutely every one of them.

LW: [21:18] Every one of them, yeah

AB: [21:19] The road systems are part of the sacred geometry, the names, the light posts, the electrical wires, the cable wires, guess what? It's all integrated into that sacred geometry.

LW: [21:30] Right, so basically humans don't have much of a chance to awaken, at all, unless-

AB: [21:36] Well they do... It's about claiming your sovereign free will. You know, before, when we were outside we were talking about, you know, the light-worker industry. And you know what? There's some really powerful lightworkers out there, and I have a little something to say to them. We can't be cheerleaders anymore. We have to be proactive. We have to get out there and march. We have to begin to use our natural presence, to create sparks of a march. In a unity march. You know, one guy may not like this guy, one guy may not like this other woman's work, but we still, in unity, have to have enough forgiveness to come together, and it's part of the "resistance of free Earth"

LW: [22:17] Yes! absolutely! I'm so for that. And that means putting aside any perceived differences, and that brings up the ego. That, so many new-age people are, you know, in love with their own creations.

AB: [22:32] Absolutely. They're lost in love, light, and bliss, and are ignorant, blissfully ignorant of reality.

LW: [22:39] Right, and so we've lost our edge and our anger. And we need that fuel, we need to become angry. (yes) We need to see the truth, and so it's important, when people are pointing out what's really happening, that lightworkers not say, "well you're just going down a conspiracy path." That we have to be able to see what we're talking about here, and understand it in deeper levels, and so that we understand how we can come together in unity consciousness. Because that is the key, isn't it?

AB: [23:17] Absolutely. Unity consciousness doesn't have disagree-ers in it. Okay? Unity consciousness doesn't have a group of cheerleaders. It has everybody, in the metaphorical term, with a sign that has a pitchfork on one and another sign that has a torch on the other. You know, I'm not saying create violence, I'm saying, the signs speak all the metaphorical language you need. On sign's a pitchfork, one sign's a torch. You have 10,000 people in the streets of America doing that, they know the mob is back. The mob has always been what they've been defeated by.

LW: [23:55] Now how so we know what to do with our information, when we know that the control system is set-up to recognize when somebody gets too much light, or they're getting too close? You know, it's like grass growing, they can see that there's-

AB: [24:14] Something growing quick.

LW: [24:15] Yeah! and they just cut it down. Isn't that how it works?

AB: [24:18] It comes to claiming their sovereign free will and using it and respecting it at every level. I came up with some spiritual removal contract documents for banking, for government, for media. And I'll be putting another one out, how to reaffirm your spiritual contract to Earth sentience, separate of a system of domination and control. You now, and I encourage people that have read those, add your own to it. It is a framework. And that framework is to you, to use the words to empower yourself, so that you understand using your sovereign free will, IS how you separate yourself from the rotten soul family that has been force-incarnated with us.

LW: [24:56] Right. And um do you have a website for that?

AB: [25:02] Yep, andrewbartzis dot com

LW: [25:03] Perfect. Um, so 2011-2014, we're in this timeframe now... What happens, so there'll be people that may not even know/be aware of what's going on...2015 will come, 16, 17, 18...

AB: [25:23] They will be in dreamtime though. And when they're ready to come out, it'll only be like a few minutes or seconds passed.

LW: [25:30] Right! because it will actually be that.

AB: [25:33] They're suspended and held into dreamtime until ready... but Earth will be breaking into local realities again. When the armies began to march, for Rome, for China, for Mongolia, they were conquering each local reality. And as they conquered all of them, they made roads to all of them and linked them to sacred geometry cities. They took away the unity consciousness and made disunity consciousness world. Because they were all centralized location to the networks of roads and dominating cities.

LW: [26:05] And that's also connected to the ley lines, right?

AB: [26:07] Correct, it was to overwrite the ley lines.

LW: [26:12] So, all these people that are doing ley line work, are they doing anything positive?

AB: [26:16] Oh, they are doing very positive work. The energy of Earth has gone from 7th dimensional, to 6th dimensional, to 5th, to 4th, to where we are now- Low 3rd. Because if we have any power, our weed grows really fast and they gotta chop it down. So- grid work, absolutely important. If we had people out there that were in some type of unity, to do grid work with 5,000 people at a time, and 1,000 target one ley line, another thousand target another... based off of a calendar system... you can change the way the ley lines create energy for all of our

brothers and sisters in this world. They ley lines create the energy pattern for consciousness to expand.

[27:04] It's also the x-y axis for astral projection. We've had thousands of societies and civilizations, that, all they did was watch those stars. And the stars that they watched aren't the same stars we watch today. Because reality is perceived through your culture. We are a media-driven culture now. They "own" our oral traditions. Our oral historians were taken away. We still have some now that are out there trying to promote it, but the people are born into the TV generation, the media generation... That's their oral history. That's not your mother and father as much anymore. And that's where it has to change, people like me coming out and doing the oral recording of the akashic record. I'm not in a trance- you can communicate and talk to me. I'm a real person.

LW: [27:53] Right, and you can get the facts.

AB: [27:56] I'm not channelling, I'm not anything like that, I'm simply in the akashic record, in a sacred neutral perspective. If I see something that's evil and dark in the akashic record, it doesn't hurt me, because it's just information. If I allow myself to go in polarity to be affected by it, I can't read the akashic record anymore. It must be a neutral recollection recalling of it

LW: [28:22] Right, that makes sense. And then that brings up the idea of working very diligently on our judgments. Because once we move into judgment, we've moved into polarity consciousness, and we're then in, you know, in duality, so... it's not that ego is bad, it's just that-

AB: [28:39] It's a survival tool.

LW: [28:40] Right. And we are coming from survival because it's being thrown at us, left right and center and every which way, including in our dreamtime.

AB: [28:50] Yep.

LW: [28:54] Well, it looks like we're about ready to take another break, and we will return with Andrew Bartzis, and we will be talking more about this stuff. Okay.

[29:03]
